Soft Keys and Buttons

In this guide, the word “button” refers to physical buttons on your phone which always perform the function for which they are labeled. The following buttons are referred to in this guide:

TRANSFER

MESSAGES

HOLD

HOME

SPEAKER

“Soft keys” are functions you see on your LCD screen. These are context sensitive, changing according to where you are in a call sequence. You select a soft key by pressing the physical button below it.

In this guide, soft keys are referred to by their name only in bold. For example, “to end an active call, press **End Call**.”

Making a Call

Option 1: With the handset still on the hook/in the cradle, dial the number and then pick up the handset or press .

Option 2: Pick up the handset, or press . Enter the phone number, and wait or press **Dial**.

Notes:

- If you pick up the handset before dialing, as described in Option 2, the system will attempt to complete the call after a slight pause. Leaving the handset in the cradle until you are finished dialing, as described in Option 1, will provide you all the time you need to enter the number in full.
- You do not need to dial 9 for an outside line, and you do not need to dial 1 for long distance.
- If you make a mistake while entering the digits, press << to erase.
