

Cowan School Corporation
Sludge Disposal Specification

- Sludge and wash water disposal shall follow all Federal, State, and Local laws
- **All sludge disposal must have a disposal certificate with location, address, and amount**
- Sludge consist of both the treatment plant and the lagoon
- Sludge can be hauled off site in liquid form to a permitted facility or dewatered on site with filtrate being pumped to the new collection system. (Cowan Schools will be responsible for the cost of pumping the filtrate to Muncie Sanitary District)
- Cowan will obtain permits for filtrate discharge and landfill disposal if needed
- **IDEM inspector Andy Schmidt shall be notified 3 days in advance for inspection before the second phase can be started**
- All work shall be digitally documented from start to finish. This will be used for the final closure documentation that will be record for the school and IDEM (email to erin@sweetenterprises.net)
- Certificate of insurance must be provided before work any work starts

On 10-17-17, Cowan received verbal approval to send water from the dewatering process to the Muncie Sanitary District. If you are planning to bid this method and have further questions, please contact dchambers@cowan.k12.in.us and erin@sweetenterprises.net .
